## PERSONAL MENTION

Mrs. A. L. Pease of Portland has been in the city during the past week visiting relatives.

Mrs. Leander, her daughter and Miss Henderickson are the guests of Mrs. Jens Hahsen, at Seaside, for a few days.

S. H. Snyder, representing the Horticultural Fire Relief, of Oregon, with headquarters at Salem, is in the city in the interest of his company.

Charley Fowler, the genial traveling freight man of the A. & C. at Portland, was in the city yesterday, on business and pleasure bent.

T. Muellhaupt, of Salem, and well known hereabout by reason of his long connection with the O. R. & N. construction department, is in the city for a few days' outing.

W. W. Ridehalgh has returned from a business trip to the Tillamook country and has a rich, ripe tan to show for his absence on the coast.

## DONE BY DEED

H. B. Lund and wife to Jacob Sture lots 13 and 17 in block 46 in Upper Astoria; \$700.

Theodore Bracke to Ole Harem lot 3 in subdivision block 61 of Upper Astoria; \$175.

## A YOUNG MAN ARRESTED

NEW YORK, July 16.—A young man who gave his name as Juan Herzfeld has been arrested here at the request of the Mexican authorities on the charge of having stolen \$5,065 from the Mexican Sugar Refining Company at El Portrero Cordora in the state of Vera Cruz. When arraigned before U. S. Commissioner Gilchrist, the prisoner counsel claimed the facts were not sufficient to warrant holding Herzfeld, but the court ordered him held for examination.

## AFTER BEEF TRUST

LONDON, July 16.—Pressed to take some action to prevent the American Beef Combine from obtaining control of the rail beef trade in England, Winston Churchill, president of the Board of Trade has informed Lord Robert Cecil in the House of Commons that the operation of the six firms constituting the beef combine were receiving the careful attention of the government. Mr. Churchill said that his investigations thus far had not convinced him of the necessity for a House of Commons committee of inquiry.

## ORDERS FOR SOLDIERS

WASHINGTON, July 16.—Orders have been issued at the war department for Battery E Fourth Artillery upon being relieved from duty at the camp of instruction, Fort Benjamin Harrison, Indiana to proceed to Fort D. A. Russell, Wyo., for station, and for Company C. First Infantry when relieved from duty at Vancouver Barracks, Wash, Sept 15, to proceed to the Presidio of Monterey, Calif., for duty at the school of musketry.

## SUES "CAP" ANSON

CHICAGO, July 16.—Adrian Anson, former captain of the Chicago National League Baseball team was defendant in a suit before Judge Landis which resulted in the appointment of a receiver for Anson's billiard and bowling establishment here. The bankruptcy proceedings followed closely the beginning of a suit against Anson on behalf of Mrs. Chas. P. Taft, sister-in-law of the presidential nominee. Mrs. Taft alleged that Anson owed her \$6,500 for rent of the premises where he has been conducting his billiard hall. Schedules of accounts due amounting to about \$20,000 were filed by the petitioning creditors.

## TELEGRAPHER DIES

HOUSTON, Tex., July 16.—John C. Witt, for more than 15 years manager of the Postal Telegraph Company on this city died early today by committing suicide by shooting. He had been in ill health for several years, for several years.

## STONECUTTER'S PRESIDENT.

NEW ALBANY, Ind., July 16.—The canvass of the vote of the International Stonecutters' Union for international officers has been complete. Joe Evans of Denver was elected president.

## JAPS IN NEW FIELD.

TOKIO, July 29.—The 700 emigrants recently despatched to Brazil by the Kokoku Imin Kaisha have safely reached their destination and are reported to have received a hearty welcome. This company projects the formation of a South American Association with a very wide field enterprise, the gist of which is the promotion of commercial, industrial and social intercourse between Japan and the states of South America.

## CHICAGO GIRL GONE.

Little Louise Prussing May Have Been Kidnapped.

CHICAGO, July 16.—Louise Prussing, the 15-year-old daughter of Eugene Prussing, a prominent attorney, disappeared last night and at an early hour today no trace of her had been discovered by her relatives or friends.

Miss Prussing was last seen by her sister Margaret sitting on the front porch of their home. When a member of the family went to call her to supper a few minutes later she had disappeared.

At first it was believed the girl might have gone to visit some of her school friends, but careful investigation failed to show that she had done so.

At midnight it was decided to notify the police and a general alarm was sent out all over the city, the theory of friends being that the child may have been kidnapped. With daylight a thorough search of the entire city was started.

Louise is a tall child for her age, being five feet seven inches in height and very beautiful.

Mr. Prussing is in New York and was notified by telephone of his child's disappearance.

## TELEPHONE VS. TELEGRAPH.

CHICAGO, July 16.—The Inter-Ocean today says: The day of the telegraph for the operation and dispatching of railroad trains is rapidly passing and the day of the telephone is at hand. The substitution of the telephone for the telegraph in train service is progressing rapidly, the movement having been accelerated by the passage and operation of the nine-hour telegraph law.

The Northwestern, the Illinois Central, the Rock Island and the Burlington roads have in operation telephone systems covering nearly 1400 miles of railroads. The same railroads are preparing to install within the next two months telephones for the operation of more than 1600 miles of additional road. In addition to this work every railroad in the United States is making careful investigation of the subject of train operation by telephone with a view of installing the best system possible.

## WOULD KILL FATHER.

Eight-Year-Old Girl Shoots Several Times But Fails.

NEW YORK, July 16.—Eighteen year old Sarah Comiskey created a lot of excitement opposite police headquarters in New Rochelle last night by firing several shots at her father, Sarman Comiskey.

According to the police, the father left his family in New York some time ago and came to board at New Rochelle. He told his fellow boarders to warn him if his daughter put in an appearance as she would make trouble. When the girl came from New York, last night, Comiskey was warned. He went directly to the police station to ask for protection. As he left the station he met his daughter who had followed him. She drew a revolver and opened fire. She wounded Comiskey slightly in the head. The girl was locked up. She said she was emulating Sarah Koten in shooting her father, because he had deserted her mother and herself. She is thought to be demented.

## OLD SKELETONS FOUND.

They May be Relics of the Revolutionary War.

NEW YORK, July 16.—Human skulls and parts of skeletons found by workmen digging a cellar at Stapleton kindled much interest among State Island residents. They are supposed to be relics of the revolutionary war, but whether they are the bones of patriotic soldiers or Hessians of the British army is hard to determine.

If the bones are those of soldiers of Washington's army it is held they should be re-interred in the National Cemetery with military honors, whereas if they belong to Hessians who held part of Staten Island during 1778-9, it is uncertain what disposition should be made of them. An appeal has been made to the local chapter of the Sons of the Revolution to determine if possible their identity and arrange for their disposition.

## WIRELESS MESSAGE

A development is now in progress in the adoption of wireless telegraphy to balloons. At first thought to be impossible, save with captive balloons, on account of the necessity of a ground connection, wireless work from balloons was demonstrated a possibility without doubt, when Major Edgar Russell of the signal corps, equipped the big service balloon number 10 with a wireless receiving apparatus and, at heights varying from one to five thousand feet, succeeded in receiving, strongly, messages transmitted from Annapolis, Md., at a distance of twenty-five miles.

In this ascent, no attempt was made to send any messages. The transmission of wireless messages from a balloon require certain special apparatus, for a reason most carefully considered by those who are to go up. Wireless sending apparatus makes electrical sparks. The spark gap itself produces a spark big enough and hot enough to ignite gas without difficulty, and even the little sparks in the make-and-break and under the key will ignite either illumination gas or hydrogen.

No one cares to go up in a balloon with a piece of apparatus so closely resembling a candle in a powder magazine.

In the receiving test recently made, Major Russell covered the outside of the basket with a wire netting, which formed the "ground" of the system. A long wire three hundred feet in length, depended from the basket, bare, and insulated from the netting. This was the "antenna" of the system,

# THE July Clearance Sale Worth While Why?

Because Benjamin Clothes at 75c on the \$1.

You know the quality; the style and the price are right.

Take advantage of this rare opportunity now.

Everything marked in plain figures; you see the price and deduct

## ORINO

Laxative Fruit Syrup

T. F. LAUREN OWL DRUG STORE.

Cleanses the system thoroughly and clears sallow complexions of pimples and blotches. It is guaranteed

## BIG SAVING

The Housewife can save a large amount from her grocery bills by canning almost everything she uses the entire year around, and have it with that fresh taste—as from garden or orchard, and she knows that her meat is free from bacteria; free from ptomaine poisoning, as well as her vegetables and fruits.

## HOW? WHY?

Can the Economy Jar do all This?

Because the Economy uses no Rubber Ring. All other jars use rubber rings, which in time decay, become porous, leak air, and spoil and mould the contents.

The Foard & Stokes Hardware Co.

## THE PLANETS

Civilization is not hand-made. The cliff-dweller rose by clinging to the tail of a wolf. Society became possible with the spinning of the first water-wheel. Modern Democracy is a machine-made product. Race progress depends on mechanical power. The steam engine was the great emancipator. It doubled the productive energy of the human race; made serfs unprofitable; abolished the galleys; stopped the treadmills; drove the harper out of the king's palace and put Caruso on the mable-topped table of every cottage. It made each man his own Columbus; sent stay-at-homes around the world; started a universal correspondence school in all the arts and science.

Every advance in dynamics is a new declaration of independence. With every step forward the "individual withers and the world is more and more." The power engineer is the poet and prophet of the greatest good to the greatest number. He is an unconscious socialist. He decreed the eight-hour day and the Saturday half-holiday. On the Pacific coast he has harnessed the glaciers which cover the high top of Mt. Ranier and set them to running the street cars in Seattle and Tacoma. Across the prairies of the middle west he has

stretched copper power wires. Taping these magic filaments, the farmer straightens his bent back and sits down to read Bernard Shaw while the cream is churning.

Merely scratch the earth's surface for a depth of 12,000 feet and water will turn, instantly into steam. The dream of the power engineer is the sinking of two pipes to that depth. Once in place he will drop high explosives to the bottom of each and discharge them simultaneously, until a connection has been formed between the bottom of the pipes. Then into the mouth of one pipe he will divert a stream of water. At the bottom of this pipe the column of water will exert a pressure of, say 5,000 pounds to the square inch and the steam resulting from its contact with the super heated rocks will automatically rise to the top of the other pipe. Harness this steam to turbines at the surface and exhaustless power will be—humanly speaking—forever available.

But the engineer is not content with planning to turn the earth itself into a great power plant. He has designs on the rest of the solar system. The music of the sphere shall keep time with the rattle of spindles. The sun and moon are to be driven tandem. Man, he declares, shall eat bread in the sweat of the planets.—Technical World.

## ...GRAND BALL...

—AT—

LOGAN'S HALL

Saturday Eve., July 18

Music furnished by the STEWART MANDOLIN ORCHESTRA. All are cordially invited.

Admission: Gentlemen - - 75c  
 Ladies Free

Pains in the back and side may come from the kidneys or liver. Lane's Family Medicine, the tonic-laxative, and a great kidney and liver remedy, will give relief.
